Bridgette A. Becker, LMT, A.C.Ht, PE

### My role as your doula:

I assist individuals, in labor, in efforts to achieve an informed and empowered birth experience. I draw upon my knowledge and experience to provide physical, emotional, and informational support to birthing individuals and their birth partners. I am independent and self-employed. As your doula, I am working for you, not for your caregiver or the hospital/birth center.

### On-call/availability:

As your retained Doula, I will be available for a period of time, spanning two weeks before an estimated due date to two weeks after the due date (38-42 weeks), in order to be available for your birth. If you go into labor before or after this period, I will do my utmost to attend your labor/birth, but my attendance is not guaranteed. I am available for phone consultations via phone and text, at any time during your pregnancy, and encourage clients to call/text with questions or updates. Once we enter the on-call period, I encourage clients to check in with me every few days to let me know how you are doing. In the event that I am unable to attend you due to no fault of my own (personal, unforeseen emergency, inclement weather, acts of God, precipitous birth), the amount paid will not be refunded, however, the contracted post partum services will be provided. If there are any limitations regarding my availability near your due date, I will list specific dates and times I would not be available and that a backup doula would attend. This list will be given and agreed to at the signing of this contract. (see Addendum A)

If I am unable to be immediately reached, during the on-call period, you are to leave a message or send a text and I will call you back as soon as possible.

I will not attend any labor/birth that is induced or augmented using Cytotec (generic name Misoprostol), as a first choice. If, after signing this contract, you opt to allow induction/augmentation of labor using this drug, I will not attend the labor/birth, and you will not be due a refund of any amount paid.

### Prenatal Conference:

Prior to the birth, there will be a prenatal meeting to review/establish your Birth Plan, and give us a chance to talk, in detail, about your preferences regarding your birth. I will ask about your knowledge of the birth process and will provide information and education as needed regarding this process. I will want to know your own personal ways of coping with pain and fatigue and difficult situations, and what internal resources we can draw upon to assist you with the birthing experience. I will want to know how you and your partner foresee working together, and the roles of others who may be attending the birth. We can discuss any fears and concerns you have regarding the birth. We will review your preferences regarding the use of pain medications.

My role is to help you have a satisfying birth, as you define it. The more we explore this in advance, the better I will be able to fulfill my role. Additional prenatal conferences may be requested, foregoing the prenatal massage, included in the contract below, or on an a la carte basis, at an additional charge. (see Addendum B)

### Early Labor:

If you believe that you may be in early labor, please call/text me, so that I may make arrangements for attending your birth. Once your labor has begun, you are encouraged to call me and, together, we will evaluate your current and projected needs. We will then plan to check in every few hours by phone so I may provide information, ideas for comfort techniques, and reassurance. It is up to you to decide at what point during your labor you want me to come and be with you. Once you make that choice, I will do my utmost to attend you within an hour. However, depending on the time of day and your location in relation to me, that is not a guarantee. I encourage you to stay at home as long as you are comfortable. I ask you to understand that, should you choose at the last moment to have an unattended home birth, i.e. without a doctor/midwife, I will not attend the birth as I am not medical personnel. In this particular situation, I will be entitled to keep the full amount paid under the contract.

### Labor:

*Comfort techniques-* I will offer assistance and advice with comfort measures such as guiding your breathing, enhancing relaxation, encouraging movement, suggesting effective positions for labor, rebozo techniques, essential oils, herbs and tinctures, and doing massage and acupressure.

*Advocacy-* I can assist with gathering information about the progress of labor to ensure that you have the information needed to make informed decisions about your birth. I do not serve as an advocate for your needs with the medical staff; instead, I support you and your birth partners in doing so.

*Emotional support-* My most critical role is providing continuous emotional reassurance and comfort.

*Immediate Postpartum:* I expect to remain with a client until there has been a successful breastfeeding session (Provided you have a normal labor/birth. Should there be extenuating circumstances, I may have to leave after the birth, returning later, when the baby is ready to nurse and I have rested). Once you are home, I provide one postpartum visit. Additional postpartum visits for breastfeeding or other help are available at an additional cost. (see Addendum B)

### What Doulas Do Not Do:

As a Labor Assistant/Doula, I am not a primary care provider. I do not and cannot give medical advice or care. I will not perform clinical tasks, such as blood pressure, fetal heart checks, vaginal exams, etc. I am there to provide only physical, emotional, and informational support. I will not make decisions for you. I will help you gather the information you need for you to make your own informed decisions. I will also remind you if there is a departure from your Birth Plan, and will verify that this, in fact, is your informed decision.

I will not speak to medical staff regarding matters where health care decisions are being made. I will discuss your concerns with you and suggest options. I will support you in discussions with staff, making sure you have the opportunity to discuss concerns, but you or your partner will speak upon your own behalf to the medical staff.
